# How I am Going to Stay Healthy During the Coronavirus

There is a virus called the Coronavirus that is making some people sick.

People who get the coronavirus might have a fever or cough.

If I get a fever or have a cough this does NOT mean that I have the Coronavirus.

Most people who get the virus will take medicine and get better.

If I need to take medicine my parents will help me figure out what to do.

I never take any medicine without talking to my parents about it first.

School is closed to help people who are sick stay home and to help me stay healthy.

My parents can tell me more about what I will do while school is closed.

I do not need to worry about getting sick, because I already know the important things to do to keep myself healthy.

I will wash my hands:

And I will stay away from people who are sick

My parents will tell me when school is open again.

I know that if I have any questions about the Coronavirus I can ask my parents.

I know that I am safe and healthy and everything is going to be alright.
